COMPOSITION (100%)

Prompt: Some studies have shown that an inclusion of drama elements in English language teaching promotes not only students' learning motivation but also their English proficiency. However, due to the exam pressure imposed on high school students and teachers, Taiwan's high school English teachers rarely consider the feasibility of incorporating drama into their teaching. If you were a high school English teacher in Taiwan, how would you incorporate drama into English language teaching? Please compose a process analysis essay stating your ideas of teaching, procedures of implementing them, and examples of possible classroom activities. Please note that your essay should have three parts: introduction, body, and conclusion.
