教育行政 科試題

申論題（共四題，每題 25 分，合計 100 分）

- 一、請說明教育行政決定的意義與類型，並舉出一種教育行政決定模式，說明此模式如何在教育行政中加以應用。（25 分）
- 二、PDCA 循環圈的理念是由美國品質管理學者 Deming 所提出，經常被用來做為教育行政計畫形成、執行與成果評估的方法。請說明 PDCA 循環圈的實施步驟，以及其運用在教育行政計畫時的注意事項。（25 分）
- 三、Recent trends indicate a rising turnover rate among school administrators in Taiwan's elementary and secondary education system, often referred to as the "administrative exodus." What are the primary factors contributing to this phenomenon? What are the primary factors contributing to this trend? Discuss the administrative strategies that school leaders can implement to address administrator well-being and retention, focusing on aspects such as organizational culture, workload management, and professional support systems. （25 分）
（註：請以中文或英文作答）
- 四、The integration of artificial intelligence (AI) and other emerging technologies in education is becoming increasingly prevalent. What are the potential benefits and limitations of using these technologies in educational administration? How should school administrators critically assess and navigate the implementation of AI and digital tools in teaching and learning? （25 分）（註：請以中文或英文作答）
